To Whom It May Concern:

I would like to thank Richard Gage, AIA and Architects and Engineers for 9/11 Truth for presenting the scientific facts behind the unprecedented destruction of the World Trade Center Twin Towers and Building 7. AE911Truth presents solid research that contradicts the official story of the building's destruction with the overwhelming evidence of explosive controlled demolition.

An accurate understanding of history is required to make good decisions in the future. Over and over again, history has shown that the first public perceptions of historical events are not always correct. I, along with millions of others, have serious questions about our country's recent history about 9/11.

I have signed the [AE911Truth.org](http://AE911Truth.org) petition calling for an unbiased investigation of the "collapses" of these three high-rise buildings. I encourage everyone to do the same, and also become a [Sustaining Member](#) of Architects and Engineers for 9/11 Truth.

Sincerely,

Signed: ***Edward Asner***
