

Become a Sustaining Member!

Support **AE911Truth.org** with your ongoing financial monthly commitment. Help us continue our remarkable momentum in the 9/11 Truth movement, improve our effectiveness, and expand outreach to the A&E community and all across America.

Our responsibilities, time commitment and expenses are growing dramatically with our increasing success. We also must purchase computers, printers, software, and handle traveling and legal expenses. Our efforts and growth cannot be sustained without your help.

Our priorities are to:

- ♦ Sign up 1,000 A&E's by the end of the year
- ♦ Perform a real 9/11 Investigation using the resources of our supporting architects, engineers and scientists
- ♦ Speak in dozens of cities
- ♦ Bring AE911Truth to the national AIA convention
- ♦ Support local street actions with our AE911Truth banners
- ♦ Place the slide presentation into the trained hands of 4 dozen A&Es and others who will speak to America directly
- ♦ Burst into mainstream media

Consider a financial commitment of as little as \$10 per month.

You can donate online at **AE911Truth.org**

Donations may also be mailed to:

Thank you very much for your support of AE911Truth.org!

Richard Gage, AIA, founder of AE911Truth, is an architect with over 20 years experience. His extensive research into the "collapses" of all 3 World Trade Center buildings presents shocking results that decimate the official story of the destruction that occurred on 9/11.

Explosive Evidence

9/11: Re-examining the
3 WTC high-rise "collapses"

ARCHITECTS
& ENGINEERS
for 9/11 TRUTH

"...An excellent job uncovering the problems of the official explanation in a scientific, non-partisan way ...an 'Inconvenient Truth' about 9/11 that everyone must be aware of. Brace yourselves."

Chris Mungenast, AIA, Architect

AE911Truth.org

WTC TWIN TOWERS

As seen in the abundance of photographs and video evidence, the collapse of the World Trade Center Twin Towers exhibited all the characteristics of destruction by explosives:

- Nearly **free-fall** acceleration through path of greatest resistance.
- Extremely **rapid onset** of destruction.
- **Unnatural symmetry** of debris cloud.
- Over one hundred first responders reported **explosions & flashes**.
- **Blast waves** blew out windows in building 400 feet away.
- Evidence of **thermite incendiary** found in steel and dust samples.
- Several **tons of molten metal** found under all 3 high-rises.
- FEMA **steel** analysis: sulfidation, oxidation and intergranular **melting**.
- Multi-ton steel sections **ejected laterally** 600 ft at 50 mph.
- **Mid-air pulverization** of 90,000 tons of concrete & metal decking.
- Massive volume of expanding **pyroclastic-like clouds**.
- Isolated **explosive ejections** 20-40 stories below demolition front.
- **Total building destruction:** dismemberment of steel framing.
- 1200-foot diameter debris field: **no "pancaked" floors** found.
- **No precedent** for steel-framed high-rise collapse due to fire.

"AE911Truth...clearly one of the most important recent developments in the 9/11 Truth movement."

David Ray Griffin, author of "Debunking 9/11 Debunking"

"...Courageous and comprehensive ...has inspired and awoken the very professionals on whose ignorance and silence the cover-up of the 9/11 crime depend. ...has brought to bear key credentials for exposing the hollow core of the official collapse story."

Jim Hoffman

"AE911 proves that a free fall of these steel structures into their own footprint is a story without merit and a challenge to common sense."

Oswaldo Valdes, Architect

"...an extensive and myth-shattering analysis of the destruction of the WTC Towers and Building 7."

Steven E. Jones, Physicist

WTC BUILDING 7

"A localized failure in a redundantly steel-framed building like WTC 7 cannot cause a catastrophic collapse like a house of cards without a simultaneous and patterned loss of several of its columns at key locations within the building."

Kamal Obeid, PE, Structural Engineer

"WTC Building 7 was not hit by aircraft, yet it collapsed nearly at free-fall speed. The small fires don't explain this, and the two reports (FEMA & NIST) don't address this or the molten metal found in the basement by the demolition contractors. I have serious questions as a result of Mr. Gage's thought provoking presentation."

John Cole, Architect

These three WTC high-rise buildings did not exhibit any characteristics of destruction by fire. Over 100 high-rise buildings with much larger, hotter, and longer-lasting fires have never collapsed.

9/11: Blueprint for Truth The Architecture of Destruction 2008 Version

In this groundbreaking multimedia presentation, filmed professionally in a studio before a live audience, San Francisco Bay Area architect, Richard Gage, AIA, provides the overwhelming evidence explosive controlled demolition of all 3 WTC high-rise buildings on September 11, 2001. (Runtime: 2 hours)
